

Find, Compare, and Reserve Your Care[®]

Better Care for less

110,000,000 Americans are covered by self-funded (self-insured) employer plans. Both the companies and their employees struggle with healthcare costs. It's possible to identify and exploit cost inefficiency in the USA, but it's hard to convince employees to seek better care for less. Well, not anymore!

DoctorGlobe brings a positive disruptive approach to the selection of health care providers in which a bonus replaces the traditional deductible. We bring an online interactive search engine (like Orbitz or Kayak), which inspires plan participants to select only quality care providers that charge under the employee's area average price.

Give us a call to start saving big on your employee related healthcare claims.

The Most Flexible:

It works with your own providers' in-network, out-of-network, our own network, and all of the above.

It displays domestic or international providers, or both, anywhere from one mile to 10,000 miles.

It ranks what participants are most interested in – quality, distance, and their bonus for making a smart choice.

Bottom line - it's all about choices.

We are a smart interactive search engine riding your employees' healthcare benefit plan

We find and display quality care providers who charge under your employees' area price

The Most Adaptable:

Tell us what your average pay on employees' care was, and we will find you better care for less.

Tell us the minimum you would like to save on your employee's care, and leave the rest to us.

Tell us what you'd like your employees' bonus to be, or let us suggest what we know should work.

Bottom Line - it's all about you.

The Most Affordable:

You get to decide between 2 payment options, which you can switch between periodically:

- 1) A modest percent of whatever savings we created by inspiring your plan participants to select Better Care for Less. Or
- 2) A few bucks per-employee-per-month, based on your employee count.

Bottom line – it's worth every dime.

We walk your employee through a rewarding journey to recovery, while saving you both a fortune
